

Riccardo Trost

Website Development Manager
Digital & Media

I am a half Italian, half Austrian Technical Project Manager and Front-End Back-End developer based in Rome, Italy, with 15 years experience. I have strong capability of analyzing, rationalizing and prioritizing goals, both individually and in a team.

In Jakala I work in tight collaboration with Sales Executives, UX/UI team Designers, Developers, IT infrastructure team, sharing knowledge and best practices, managing projects coordinating many involved streams.

As a freelance I am capable to plan and accomplish autonomously every aspect of a website development, keeping my clients updated with constant feedbacks.

WORKING EXPERIENCES

Jakala S.p.a. S.B.

Product Coordinator at Amplifon S.p.a. as consultant [October 2021 – current]

Since October 2021, I have been asked to support the client Amplifon SpA in the project management of B2C smartphone app development and B2B desktop app development.

The activity, specifically Product Coordinator, requires:

- constant alignment with the Product Owner
- management and alignment of development teams
- management and alignment of hardware suppliers
- alignment with the different streams/teams of related projects
- interfacing with procurement teams and IT infrastructure
- alignment and coordination with stakeholders of the different countries of each world region (EMEA, US, APAC)
- analysis and evaluation of individual development activities
- analysis, requests and evaluation for cross-stream activities
- management of activities in a mixed AGILE/WATERFALL context
- analysis, verification and management of bugs and anomalies
- analysis and re-mapping of technical data communication architectures via APIs and DBs on different platforms

77 Agency S.r.l. / Jakala S.p.a. S.B.

Technical Project Manager *[November 2013 – current]*

Initially hired as a web developer with WordPress skills, after 6 months I was appointed Project Management with technical skills. Since then, I work on many web design & development projects with different budgets and requirements.

- Several years of experience as project manager in an international environment
- Business case analysis with focus on tech requirements and tech pitch presentation
- Responsibility for staying within the schedule and budget during all project phases from conception to the execution
- Project team definition and initiation documents
- Work breakdown structure and GANTT definition
- Stakeholders management
- Responsible for technical requirements and design process definition of the project
- Responsible for managing a team assigned to a specific project
- Tasks schedule management to timeline and to organizational costs and budget while communicating project status to the company management, project owner and project stakeholders
- Filling and review of technical and commercial documentation both in English and Italian: requirements, estimation, plan development and project schedules. Activities definition, work effort, time frame and resources.
- Interested in trends and development in payment services, mobile apps and technology
- Manage all aspects of business and systems analysis in support of Mobile projects such as IOS/Android
- Continuously track and report on the progress of iOS and Android projects to the Chief Product Officer
- Proactively manage changes in project scope, identify potential hurdles, and devise contingency plans
- Work with our internal designer to ensure timely delivery of designs to the development team
- Familiarity with UX management and processes
- Use tested user experience principles to design experiences that are simple and transparent
- Identification, analysis and problem management during the whole project lifecycle.
- Test and quality verification of deliverables.

Freelance

Front-end and Back-end developer *[September 2007 – current occasionally]*

- Engaging clients commissions and project related requirements definition
- Planning websites architecture (structure definition, wireframes, design and development)
- Creation of engaging and project-context website designs
- Development using W3C compliant markup and code (HTML, CSS, PHP)
- Communication with stakeholders about project development, progress status and completion
- Freelance finance management (budget and profits)
